DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-46, drawn to a method and/or a computer program product for performing an assessment, classified in class 705, subclass 35.
 - II. Claims 47-74, drawn to a system for managing monies and information in connection with insurance insolvency operations, classified in class 705, subclass 30.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility as a computerized arrangement for planning the disposition or use of funds or securities, or extension of credit. Invention II has separate utility as a computerized arrangement for recording, analyzing, verifying, or reporting of funds or other quantitatively innumerable factors used in a business. See MPEP § 806.05(d).

Art Unit: 3626

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and/or because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
